Honey Collection from *Anatolia*

## Pure Honey from the Nature of Anatolia

Anatolia is one of the world's richest floral regions, offering a unique biodiversity for exceptional honey production.

Türkiye is the global leader in pine honey, producing over 90% of the world's supply.

High-altitude plateaus, pine forests and diverse flora give our honey its distinctive taste and purity.

*Each drop reflects the untouched and balanced richness of nature.*

# About FAMERON·BIO

Fameron Bio is a Turkish company focused on developing innovative food products by combining nature, quality, and modern production approaches.

With expertise in honey-based products, natural ingredients, and value-added food innovations, we offer a diverse portfolio including pure honey, cream honey, fruit honey blends, and specialty honey products.

Our mission is to create distinctive products that meet the expectations of modern consumers while maintaining the highest standards of quality, traceability, and food safety.

Today, Fameron Bio serves both domestic and international markets and continues to expand its presence through innovative product development and export-oriented growth.

# Raw Honey Collection

## Pine Honey

Naturally produced in the ancient pine forests of Türkiye's Aegean region, this unique honey is not derived from flower nectar but from pine tree honeydew collected by bees. The result is a dark, dense and slow-crystallizing honey with a deep woody aroma and long-lasting taste profile.

It is especially valued for its mineral richness and stable structure, making it one of the most distinctive honey types in global honey markets.

## Chestnut Honey

Harvested from chestnut forest regions of Türkiye, this honey is known for its strong, slightly bitter and highly aromatic profile. Its intense flavor comes from the unique chestnut blossoms, creating a powerful taste that is instantly recognizable.

It is considered a premium gourmet honey in international markets due to its limited production, dark color, and complex flavor structure that lingers on the palate.

## Flower (Wildflower) Honey

Collected from a wide variety of wildflowers in highland and meadow regions of Türkiye, this honey represents a naturally balanced and seasonal floral composition. Each harvest carries a slightly different aroma profile depending on the botanical diversity of the region.

It is smooth, easy to consume, and widely preferred for daily use due to its light texture, natural sweetness, and well-rounded flavor.

## Lavender Honey

Harvested from lavender-rich regions of Türkiye, this honey carries a refined floral aroma with soft herbal undertones. Its light texture and elegant sweetness create a smooth and calming taste experience that stands out in premium wellness and gourmet markets.

It is especially valued for its aromatic profile and lifestyle appeal, making it a strong export product in luxury food and natural product segments.

**FLOWER HONEY**  
*Wildflower meadow illustrations, rich amber honey*

**CHESTNUT HONEY**  
*Chestnut leaves and nuts, dark thicker, dark reddish-brown honey*

**PINE HONEY**  
*Pine trees and cones, Mistlethru, thick dark amber honey*

**LAVENDER HONEY**  
*Lavender sprigs and bees, light golden honey*

# FRUIT HONEY COLLECTION

Real Fruits. Real Honey. Real Innovation.  
Crafted with real freeze-dried fruits and premium floral honey.

Strawberry Honey

Forest Fruit Honey

Lemon & Propolis Honey

## What Makes It Different?

Real Freeze-dried  
Fruit Powder

Lab Tested  
Every Batch

Natural  
Raw Honey

No Artificial  
Flavors

No Artificial  
Colors

No Added  
Sugar

Crafted with raw honey and real freeze-dried fruit, offering a delicious taste enjoyed by **the whole family—even children who don't usually enjoy traditional honey.**

### Additional Fruit Options

- Mango • Orange
- Peach • Pineapple
- Blueberry • Apricot

Available upon request for custom production and private label projects.
